Software and Open Source

- *Languages & tools:* C++ (libtorch), Rust, C, Shell; daily development on Arch Linux + Neovim; Git.
- *Projects:* Calman (Rust, task & event manager, JSONL/ICS, CalDAV-compatible), Markerss (Rust ratatui, TUI RSS reader, design-doc-driven), Lichtung (Hugo theme powering two personal sites), suckless (my own fork of dwm/dwmblocks, patched by hand in C).)
- *AI4Math engineering:* built a research harness for AI-assisted mathematics; learning model pre-training, post-training & fine-tuning, mathematical data processing, and the Lean 4 formalization language.
